SUMMARY

Creative and detail-oriented front-end developer with 3+ years of experience designing and developing scalable, responsive web applications. Proficient in modern technologies including React, Redux, and Tailwind CSS. Skilled in optimizing performance, enhancing user experience, and collaborating in Agile teams to deliver impactful solutions for FinTech and other industries.

EXPERIENCE

FlexFinance, Surulere, Lagos - *Frontend Developer* - **JANUARY 2023 - PRESENT**

- Implemented a feature enabling users to add and edit amounts. A loader function was added to improve user experience before displaying bulk transfer transactions. I also worked on generating receipts for successful bulk transfer transactions.
- Implemented and integrated a textarea to allow the disbursing party to add a reason when declining the amount requested by a requester.
- Worked on utilizing the API to retrieve the user's last 5 expenses and display them along with the actual transaction dates.
- Collaborated with my team to implement two key features:
    - ❖ firstly, I developed a redirect mechanism for users without a department on the web app, guiding them to a page where they could create a department.
    - ❖ Secondly, I designed and implemented a form allowing users to select a department when submitting a request.
- Fixed bugs in the codebase, including the request form not disappearing after approval and users not being redirected to the "send money" page after a bulk transaction failure. Also fixed the search functionality on bulk transactions, enabling users to find failed transactions, etc.
- Redesigned critical user interfaces (e.g., Two-Factor Authentication and navigation menus), enhancing responsiveness and visual clarity.
- Optimized the codebase by removing unused files and dependencies, reducing app size by 30%, and boosting performance metrics.
- Collaborated with engineers on the user onboarding form, focusing on PIN input and email validation, enabling users to optionally update their emails, and creating and integrating a multi-level form to collect directors' info and upload required documents.
- Collaborated with a backend engineer to develop and enhance virtual card solutions by implementing real-time funding mechanisms and user assignment features, enabling secure management, efficient distribution of funds, and improved system reliability through API integrations.

FlexFinance, Surulere, Lagos - *Web Developer* - **JANUARY 2022 - DECEMBER 2022**

- Built and maintained the company's website, blog, and onboarding form, driving a 400% increase in monthly traffic through enhanced SEO practices.
- Integrated Google Analytics and Google Tag Manager to track website traffic, user engagement, conversions, and clicks with precision. Improved search engine visibility by implementing key files such as robots.txt and sitemap.xml, and ensuring proper submission to Google Search Console.
- Trained and mentored an intern, fostering knowledge transfer and ensuring team growth.
- Optimized website size from 9.5MB to 3.7MB, resulting in a 60% improvement in page load speed.
- Optimized website responsiveness, regularly updated and curated blog content, and continuously worked on enhancements to improve the overall user experience.

OneVenn, Oshodi, Lagos - *Frontend developer* - **JULY 2021 - DECEMBER 2021**

- Designed and developed essential application features, including sign-up, welcome pages, and logos contributing to improved user onboarding processes.
- Collaborated across teams to refine an event management application's usability and performance.

Freelance, Lagos - *Frontend Developer* - **JANUARY 2020 - JUNE 2021**

- Created multiple applications (e.g., e-commerce, weather app) using React, Tailwind CSS, and Redux, gaining hands-on expertise in modern front-end development.

Roak Survey Service, Ikeja, Lagos - *Surveyor* - **NOVEMBER 2018 - DECEMBER 2019**

Ministry of land and housing, Minna, Niger - *Surveyor* - **DECEMBER 2017 - OCTOBER 2018**
